

WE ARE LOOKING FOR A

▶▶▶ Working Student QA & VR Testing (m/f/d)

Location: Munich, part-time

About VRdirect

We are a Munich based tech-company with the mission to set the standard for tomorrow's way of working. Virtual Reality – as proven technology – paves the way for our enterprise customers like Siemens, Porsche, SAP and Telekom to easily access innovation and drive business efficiency.

Check out how this looks in daily business **here** and if you want to dig deeper into how our software works, just visit: <https://www.vrdirect.com/platform>

Help us improve our product by:

- » Execute and plan quality assurance and systematic testing on software, apps and VR devices
- » Contribute to maintaining and enhancing the processes for QA, bug reporting and feature requests
- » Administer device management on-site
- » Conduct VR-technology related research

Your profile:

- » Enrolled student, preferably in informatics, digital technologies or a similar field of study
- » High interest in technical solutions and Virtual Reality
- » Ability to step into a user's experience
- » Firm believer in structure and process management
- » Very good communication and documentation skills in German and English

Nice to have:

- » Experience with VR devices
- » Basic knowledge of software and app development

What we offer

Take the opportunity to be part of a successful and fast-growing Start-Up. Our workplace consists of friendly, international and highly motivated team members and is characterized by an open and companionable work ethic. We offer a flexible working hours model that can be adapted to your individual needs (maximum 20 hours per week, can be increased during the semester break).
